

AMENDMENTS TO THE SPECIFICATION

Please replace the title starting on page 1, line 1 with the following amended title:

**SPEED DEPENDENT AUTOMATIC ZOOMING VEHICLE NAVIGATION
INTERFACE**

Please replace the paragraph starting on page 27, line 2 with the following amended paragraph:

Speed-dependent automatic zooming through content such as documents and images is disclosed. In one embodiment, a method first received an input such as a vehicle speed input ~~a user input on an input device, like a joystick, a mouse, a trackball, or other pointing device~~. The input is mapped to either speed of navigation through a content space of a vehicle navigation display, or scale of the content space while being navigated. The other of speed or scale to which the input was not mapped is then determined, based on the relationship that scale times speed equals a constant. The content space is then navigated, based on the speed or scale mapped from the input, and the scale or speed is determined.
